

New Metal Roof

Description:

Approach to roofing services:

Quality over quantity at the right price and personalized customer service is the living philosophy Platinum Roofing.

Environmentally friendly roofing: Metal roofing can save up to 40% in cooling costs and up to 38% on homeowners insurance. It reflects up to 70% of the solar radiation absorbed in your attic by asphalt roofing, and also cools your home by re-emitting up to 90% of the absorbed solar radiation. With main emphasis on environmentally friendly and energy efficient metal roofing technology, Platinum Roofing services homeowners in TX, OK, AR and LA.

Roofing Services:

Flexibility and choice of roofing materials provide a great variety of options for our customers.

Platinum Roofing is the premier provider of custom roofing solutions featuring Stone Coated Steel such as Gerard, Decra and Metro as well as Synthetics such as Lamarite, DaVinci and Dura Slate. We also carry a full line of Vertical Panel and composition roofing products.

Commercial roofing services:

For commercial companies we can offer custom metal roofing materials that will integrate and work well for their purposes.

Flexibility:

We have unique ability to adjust our services to our clients needs.

Whatever the scope of work requires, we can come with the right solution that makes sense financially and aesthetically.
